## TILEFISH COMMERCIAL FISHERY IN GULF OF MEXICO FEDERAL WATERS WILL CLOSE AT 12:01 A.M., LOCAL TIME, JULY 22, 2006

NOAA Fisheries Service announces the commercial fishery for tilefish in Gulf of Mexico federal waters will close at 12:01 a.m., local time, on July 22, 2006, when the tilefish quota of 440,000 pounds, gutted weight, is projected to be reached. The existing regulations require closure of the tilefish fishery when the quota is reached. The commercial fishery will remain closed until 12:01 a.m., local time, January 1, 2007. The operator of a vessel with a valid reef fish permit having tilefish aboard must have landed and sold such tilefish prior to 12:01 a.m., local time, July 22, 2006.

NOAA Fisheries Service is dedicated to protecting and preserving our nation's living marine resources and their habitats through scientific research, management and enforcement. NOAA Fisheries Service provides effective stewardship of these resources for the benefit of the nation, supporting coastal communities that depend upon them, and helping to provide safe and healthy seafood to

consumers and recreational opportunities for the American public.

In 2007 NOAA, an agency of the U.S. Commerce Department, celebrates 200 years of science and service to the nation. Starting with establishment of the U.S. Coast and Geodetic Survey in 1807 by Thomas Jefferson much of America's scientific heritage is rooted in NOAA. The agency is dedicated to enhancing economic security and national safety through the prediction and research of weather and climate-related events and information service delivery for transportation, and by providing environmental stewardship of our nation's coastal and marine resources. Through the emerging Global Earth Observation System of Systems (GEOSS), NOAA is working with its federal partners and more than 60 countries to develop a global monitoring network that is as integrated as the planet it observes.
